

To scale our team, we are looking for a

## Cloud Platform Engineer

Scigility builds custom data services and products with a holistic offering that covers architecture, platform engineering, data engineering and implementation of ML applications.

### Your Tasks

- Design, build, operate and maintain modern data analytics platforms, both in the cloud, on-premise and hybrid.
- Leverage state-of-the-art technologies, tools and methodologies to achieve your goals.
- Automate platform lifecycles according to IaC principles
- Review, audit and troubleshoot existing solutions and system architectures
- Participate in customer workshops and presentations of proposed solutions
- Explore available technologies to provide business support to our clients
- Get involved in Scigility internally, e.g.:
  - Provide input to help shaping our technology strategy
  - Do tech sessions to promote sharing internal knowledge
  - Participate in pre-sales activities
  - Be a mentor for new-joiners

Note that your exact responsibilities can vary between different projects. If that sounds exciting to you, you have come to the right place!

### Your Profile

- Degree in computer science or equivalent
- Valid working permit in the location you are applying for
- Proactive team player attitude with the ability to work independently and accurately in interdisciplinary projects
- Curiosity for new technologies and willingness to learn
- Strong problem solving skills
- Strong command of English
  - For CH, additional good knowledge of German or French is beneficial
  - For AT, additional strong command of German is required
- Hands-on experience in applying IaC and deployment automation using a Ansible, Terraform, or a similar technology
- Proficiency in Linux administration, networking & security setup and troubleshooting

### Your Bonus Skills

Hands-on experience with

- Cloud environments (AWS, Azure or GCP)
- Microservices, Docker and Kubernetes
- Big Data or distributed technologies (Hadoop, Kafka, etc.)

## Your Benefits

- Annual IT budget and home office equipment of your choice
- Flat company hierarchy, directly approaching colleagues is highly welcomed
- Possibility to work remotely
- Flexible working hours, high level of autonomy and individual responsibility
- You can invest up to 20% in further education on company costs
- Career framework with a clear growth path
- Transparent salary structures and compensation incl. performance bonus

## SCIGILITY in a Nutshell

- A team of 20+ highly motivated engineers with diverse backgrounds
- A motivated and friendly environment, everyone just a chat message away to collaborate anytime
- High diversity and multiculturalism, equal opportunities
- Monthly company all-hands meetings to foster a positive team culture

## Your Application

Interested to join us? Still undecided and want to chat with an engineer?

We are happy to receive your online application or help you with any further questions under [jobs@scigility.com](mailto:jobs@scigility.com).
